COURSE DESCRIPTION

The focus of this course is on providing students with applied knowledge related to conducting clinical effectiveness and implementation science studies that involve communities as collaborators in the research process. Communities are broadly defined and can include: physicians, policymakers, state agencies, and patients and their families, among others. Students in this course will focus on:

- Examining the development of patient-centered, clinical effectiveness studies that engage communities;
- Identifying strategies to form partnerships with communities to address gaps in knowledge around evidence-based interventions; and
- Examining strategies to incorporate patient and other stakeholder preferences and outcomes in clinical effectiveness studies.

Specific examples of community-engaged approaches will be discussed. Because students obtain methods training in other courses throughout the curriculum, the focus of this course is on critical appraisal of the appropriateness of the methods used relative to the study question and the implications of the study design for translating evidence into practice.

COURSE OBJECTIVES

The primary goals of this course are to enhance students’ knowledge about how to involve communities and key stakeholders in clinical effectiveness and implementation science research.

Students who successfully complete the course will be able to:

- Discuss the major concepts related to engaging communities in the design, implementation, interpretation and dissemination of research;
- Identify the benefits and barriers to involving community collaborations in clinical effectiveness and implementation science studies, as well as strategies for overcoming key barriers;
• Develop strategies for engaging communities in identifying study topics of importance to them and beginning the process of protocol development;
• Discuss some sentinel studies in clinical effectiveness and implementation science research, their study designs, and strategies for involving community collaborations to build upon and improve those designs;
• Describe the role of stakeholders and how to involve them in clinical effectiveness research, including the role of practice-based research networks;
• Critically evaluate clinical effectiveness studies that have incorporated community engagement by assessing the strengths and limitations of the study design as well as involvement of stakeholders in the study design and selection of outcomes.

COURSE PROCEDURE
Class time will be used for presentations and class discussion. Most classes will begin with presentation of a major topic, followed by class discussion. The course will be enhanced by students’ active involvement in the course. Each class session will have assigned readings that must be completed prior to class. Students are expected to come to each class prepared and to actively and constructively participate in class discussions centered around the required readings.

STUDENT COURSE REQUIREMENTS
The following will be used to assess students’ progress in achieving the course objectives:

1. Attendance and participation. Each student is expected to be an active and regular participant in class discussions. Students should come to class prepared to discuss the strengths and weaknesses of the assigned readings as well as how the readings apply to their own research interests.

2. Discussion lead. In addition, each student will select one week (from Weeks 3, 4, 6, 8, or 10) to lead class discussion on a peer-reviewed paper of their choosing relevant to the week’s topic. This paper will be in addition to the assigned readings for that week and must be selected at least one week prior to the class.

3. Review or commentary paper. Students will identify a specific topic in community engagement and translational science that is related to their research interests. During the semester, students will research and write a paper that addresses their topic. This may be a scoping review, a systematic review, or a commentary paper, which will be submitted for publication in a peer-reviewed journal of the student’s choice. The paper should follow the content, style, and formatting guidelines of the selected journal.

EVALUATION AND GRADING:
Grades will be based on the attendance and participation in class discussions (35% - for Weeks 1, 2, 3, 4, 6, 8, 10; 5% per week); the Discussion Lead assignment (10%); the final paper outline (15%); and the final paper (40%). All deadlines must be met. Any assignment turned in late will receive a 10 percentage point reduction in the final grade. The following grading system will be used: A (95% or higher), A- (90-94%), B+ (87%-89%), B (83%-86%), B- (80-82%), C+ (77%-79%), C (73%-76%), C- (70-72%), D+ (67-69%), D (63%-66%), D- (60-62%), and E (<59%). Information on UF grading policies can be found at: https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx.
**TEXTBOOKS AND READINGS:**

Supplementary readings will be assigned and may be expanded beyond what is outlined in the syllabus.

REVIEW/COMMENTARY PAPER

The final paper may be a scoping review, systematic review, or commentary (between 2,000 and 5,000 words), which students will submit to a peer-reviewed journal of their choice after receiving their final grades.

- An outline of the paper will be due in Week 5, submitted to the instructor by email no later than 5 pm on Feb. 5. There will be no class meeting that day. This written assignment will include: (1) a clear description of the topic and working title; (2) the target peer-reviewed journal; (3) a conceptual framework based on concepts of community-engaged research discussed in this course; (4) a brief review methodology (with supporting references); (5) an outline of the major paper sections; and (6) any additional preparatory notes, including potential challenges

- The final paper will be due in Week 10, submitted to the instructor by email no later than 5 pm on March 18. There will be no class meeting that day. The paper should follow the content, style, and formatting guidelines of the student’s selected journal. A rubric for this assignment will be available on Canvas.

• One Florida Clinical Research Consortium | Warren et al., 2018  
Hoekstra et al., 2018  
Shenkman et al., 2018 |
| March 11|                                                                               |                                                                           |                                                        |
| Week 11 | Independent Study                                                            | -                                                                        | -                                                      |
| March 18| Final papers due (no class)                                                   |                                                                           |                                                        |
COURSE POLICIES

Class Decorum
Please: (1) be on time, (2) respect others’ points of view, (3) listen quietly when others are speaking, and (4) turn off cell phones, alarms, and other such distractions.

Returned Assignments
Keep copies of all assignments that you submit and of all grades until you receive official notification of your final course grade.

Attendance Policy
Class attendance is mandatory. Excused absences follow the criteria of the UF Graduate Catalog (e.g., illness, serious family emergency, military obligations, religious holidays), and should be communicated to the instructor prior to the missed class day when possible. The UF Graduate Catalog is available at http://gradcatalog.ufl.edu/. Students should read the assigned readings prior to the class meetings, and be prepared to discuss the material. Regardless of attendance, students are responsible for all material presented in class and meeting the scheduled due dates for class assignments.

Policy on Make-Up Work
Students are allowed to make up work only as the result of illness or other unanticipated circumstances. In the event of such emergency, documentation will be required in conformance with university policy. Work missed for any other reason will earn a grade of zero.

Special Needs
Students requiring accommodations for special needs or disabilities must first register with the Dean of Students' Office (352-392-8565, www.dso.ufl.edu/drc/). The Dean of Students' Office will provide documentation to the student who must then provide this documentation to the faculty member when requesting accommodation. The College is committed to providing reasonable accommodations to assist students in their coursework.

Academic Honesty
You are expected and required to comply with the University’s academic honesty policy (University of Florida Rules 6C1-4.017 Student Affairs: Academic Honesty Guidelines, available at http://regulations.ufl.edu/chapter4/4017.pdf). The Honor Code states: “We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.” Cheating, plagiarism, and other forms of academic dishonesty will not be tolerated. Note that misrepresentation of the truth for academic gain (e.g., misrepresenting your personal circumstances to get special consideration) constitutes cheating under the University of Florida Academic Honesty Guidelines.

Course Evaluations
Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback is available at https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at https://gatorevals.aa.ufl.edu/public-results/.
